Manufacturing

Member since June 2012

## Management and Leadership

### Environmental Policy Statement

*We at the Kirk-Habicht Company are committed to reducing our environmental impact. Our company will strive thru continuous review and improvement on actions and manufacturing procedures to maintain and improve our impact on the environment. We will comply with all applicable guidelines and regulations. We will also reduce pollution and work toward a zero landfill environment.*

*Mark Habicht*

### Environmental Team

*We meet on a monthly basis. Our team consists of members from the office, shop, and management. We monitor all aspects of our operations from recycling to end of shift equipment shutdowns and energy usage at our facility.*

## Waste

### Recycling

*We recycle paper, plastic, glass etc. We also recycle any scrap metal leftover from a job run such as steel and stainless steel.*

**Hazardous Waste/Toxic Use Reduction**

*Our company has a fully contained system for our passivation and polishing system. The water used in this system is pumped thru cation and anion tanks for filtering and when the tanks become spent, they are then taken for cleaning and recharging. Other oils and solvents are collected into steel drums and then picked up by a facility for decontamination and disposal.*

**Energy**

**Energy Efficiency**

*We have repaired the gasket on one of our large ovens and have also saved \$1,469.00 annually by repairing compressed air leaks. We have replaced lighting in the shop allowing for 25% less kilowatt hour usage.*

*Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.*
